If there's quality, there's Cosper

Cosper. Experience and a flexible and qualified staff.

The COS.PER Company. Realty LTD, founded November 17, 1983 by workers with twenty years experience, it operates throughout Italy and specializes in the drilling industry and special works of the subsoil, as micropiles and tie rods. The company is constantly updated on the equipment that is on materials, in order to guarantee the highest quality of service according to the rules dictated by the Legislative Decree. April 9, 2008, n.81.

At the beginning of the COS.PER. Real estate was operating mainly in the field of large diameter bored piles and in construction and maintenance of wells.

Subsequently, since the early 90s, the company has gradually developed into a highly specialized structure in the geological and geotechnical field, thanks to the acquisition of new technologies. Currently the company operates in all branches of the drilling sector, performing geological surveys of all types and realizing large-diameter bored piles, drains and microdreni, micropiles, tie rods and diaphragms for A.C. continuous septa or plastic.

The considerable experience gained in the sector, after carrying out a wide range of interventions of different types and degree of difficulty varies greatly, now enable the company to count a highly specialized staff with an appreciable level of theoretical and practical preparation. Significant and steady is also the upgrade and research activities at all levels in the industry. The COS.PER. Property has a wide range of operating machines designed and manufactured so as to satisfy the most varied operational requirements, by the hydraulic augers large to the specific machines to realize the small diameter holes, as well as drill rigs to operate in places of difficult access or on scaffolding. It 'also equipped workshop for the operational maintenance of the equipment and for the realization of special pieces.
